

**SECTION 1: IDENTIFICATION**

Product identifier used on the label	V-Light PRO
Recommended use of the chemical and restrictions on use	V-Light is a high-performance coating based on silicon dioxide, specially developed to recover headlights composed of polycarbonate and that have oxidized over time. The product forms a glassy, semi-flexible film, of high transparency and resistance, which withstands the expansions that polycarbonate headlights suffer with temperature variation, without running the risk of cracking or yellowing again over time.
